

RESPIRATORS: OSHA Compliance Made Easy

OSHA Approved Fit Testing

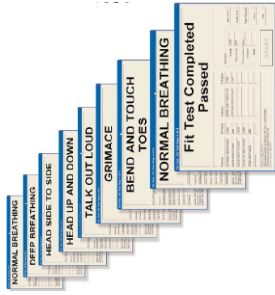

SafeAssure Consultants, Inc. will provide your organization with a comprehensive, cost effective option that fulfills OSHA's respirator fit testing standards.

The OSHA respiratory protection standard 29CFR1910.134 recognizes the PORTACOUNT and provides specific protocols for fit testing throughout the United States.

PORTACOUNT Equipment

FitPlus software provides electronic Recordkeeping/Documentation for your organization.

OSHA Compliant Written Policies

SafeAssure will develop written respirator policies that fulfill OSHA 29 CFR 1910.134 Subpart (C). Both Electronic and Written Programs are available.

Employee Respirator Training

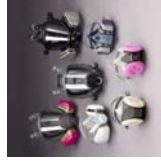

SafeAssure performs employee training which fulfills OSHA 29 CFR 1910.134 Subpart (K). Specific employee training programs are developed to fit each organization's various respirator needs.

Fit-Test Any Tight Fitting Respirator!

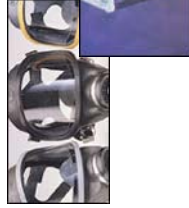

The PORTACOUNT system eliminates fit testing hoods and chemical exposure hazards common with other testing methods. A computer-generated pass or fail indicator will provide each employee with complete results of the fit test findings.

SafeAssure can provide fit testing for tight fitting respirators including-

Elastomeric Face Masks

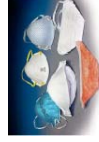

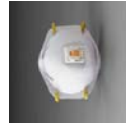

Powered Air Purifying Respirators (PAPR)

Self-Contained Breathing Apparatus (SCBA)

Disposable respirators

N-95 Mask

PORTACOUNT

Fit-Test Advantages

Respiratory Medical Clearance

In the time it takes to fill out the Medical Questionnaire, your organization can receive respirator medical clearance for your employees. This is an On-Line Medical Questionnaire/Clearance Service for SafeAssure Clients and Customers. For all brands of respirators, SafeAssure will have your questionnaire evaluated for a minimal charge. This service is available to those employees that require a first time medical clearance or want/need a more current medical clearance.
